NOTICE.

In presenting this edition of my Fruit Tree Catalogue to the public, I would observe that many additions have been made to the various classes of Fruits, so as to include every novelty of merit, with all the well tested varieties.

My attention is constantly devoted to every phase of the business, with which I am practically conversant. Every care has been taken in obtaining fruit trees correct to name from the most reliable sources in this country and Europe; and as all are grown under my personal supervision, I feel confident that the nomenclature is as near perfect as possible. The soil of the nurseries being new and fresh, and admirably adapted for the growth of trees and diffusion of roots, the trees are of the most vigorous and healthy description. Those varieties of Apple, Pear, Peach, &c., suitable for the Middle, Southern and Southwestern States, are extensively propagated; it being well known that many varieties, especially of the two former, which succeed well in the Northern States, do not retain their good qualities farther South.

All new Fruits of value as they appear are introduced, propagated as rapidly as possible, and sold at the lowest prices that such can be offered at.

New Pears, Peaches, Grapes, Strawberries, &c., are yearly being added.

I shall be most happy to select for my patrons, when such is their wish, the most desirable varieties of Fruit Trees for any soils, localities or latitudes.

Packing is executed in a thorough and careful way, and by which they will go to the most distant parts of the United States or Europe with perfect safety; for which a charge is made sufficient to cover the expense. No charge is made for the delivery of goods in the city.

 Parties ordering should particularly state the route or conveyance they wish the goods forwarded by; omitting to do this, they will be forwarded by the best known route; but I wish it to be understood, I assume no responsibility after they are delivered to the forwarders.

I employ no agents or pedlers, and request all my patrons to send their orders direct to the Nurseries.

Terms of payment, invariably cash.  

JOHN SAUL,  
Washington City, D. C.

PLANTS, VINES, &c., BY MAIL.

Small Trees, Vines, Plants, &c., sent safely by Mail. For forwarding such, we charge sufficient to cover postage.

This Catalogue annuls prices in all former issues.
HINTS ON TRANSPLANTING, &C.

The many excellent treatises on Fruit tree culture, which have appeared within the last few years—one or more of which should be in the hands of every person intending to plant—renders it almost unnecessary to give any directions for planting, yet I am so frequently asked for advice in this way, that I have concluded to offer a few brief remarks.

The situation of the orchard having been decided on, the ground should the season previous be prepared by manuring, and the cultivation of some green or vegetable crops,— Clover or field Peas ploughed under when green is excellent, so that the ground may be in thorough good order,—it should be deeply ploughed and subsoiled. The holes should be dug three to four feet in diameter and eighteen inches in depth; examine the roots carefully and all mutilated or bruised parts cut off; break the top soil down into the holes and the same with some well prepared compost, should be carefully worked in between every root, and fibre, filling up every crevice,—that every root may be in contact with the soil, making the whole quite firm. The tree, when planted, should stand about the same height as it stood in the Nursery, or a few inches higher, allowing for the settling down of the soil. It should also be securely staked to prevent rocking about, chafing, &c.

The tops should be shortened more or less in proportion to size and variety of tree.

TREATMENT OF TREES RECEIVED IN WINTER DURING FROST.

The bundles or boxes of trees as received should be placed in a cellar or some place where the frost cannot penetrate, and remain there until a thaw takes place, and then be unpacked and planted; with this treatment even if they are frozen through when received, they will not sustain the least injury.

DISTANCE BETWEEN TREES IN ORCHARDS.

Standard Apples, 30 feet apart each way. In poor soils 25 feet is sufficient.
Standard Pears and Cherries, 18 to 20 feet apart each way, except Duke and Morello for which 15 feet is ample.
Standard Plums, Peaches, Apricots and Nectarines, 15 to 18 feet apart each way.
Quinces, 10 to 12 feet apart each way.
Pyramidal Apples, Pears, Cherries and Plums, 10 feet apart each way.
Dwarf Apples. (bushes) 8 feet apart.
Currants and Gooseberries, 3 to 4 feet apart each way.
Raspberries in rows, 5 feet apart, and 2 feet apart in the row.

Rawles' Janet, (Rock Rimmon,) medium to large, yellow, striped with red, tender, juicy, crisp, vinous flavor; a profuse bearer; a good Southern apple. Feb. to June.

Red Winter Pemiscot, (Buncombe, Meigs,) medium, roundish oblong, yellowish white, shaded with maroon, flesh yellowish, rich, juicy, subacid and fine; a good bearer. Nov. to Feb.

Rhode Island Greening, large, roundish, pale green, flesh yellow, tender, crisp, subacid juice; a popular apple. Mar. to Apr.

Rome Beauty, large, roundish, yellow, shaded and striped with bright red, flesh yellowish, tender, juicy, subacid. Oct. to Dec.

Russet, American Golden, (or Bullock's Pippin,) medium size, dull russet, tinged with red on sunny side, flesh crisp, juicy and high flavored; good bearer. Nov. to Apr.

Russet, Roxbury or Boston, medium to large, greenish, covered with russet, rough, flesh greenish white, moderately juicy, subacid flavor. Jan. to June.

Saul's Seedling. Similar to Newtown Pippin, but larger, more tapering to blossom end—bright crimson cheek, flesh white, juicy, subacid; delicious. Nov. to Feb.

Saul's Beauty, small, medium, white, with dark spots in the shade, blush cheek in the sun, flesh white, delicious, of the finest quality; a vigorous grower, bearing in clusters. Oct. to Feb.

Smith's Cider, large, red and yellow, tender, juicy, crisp, subacid; handsome and very productive. Nov. to Feb.

Spitzenburg Esopus, large, dark red, delicately coated with bloom, flesh yellow, crisp, rich, juicy, delicious; an abundant bearer; excellent. Dec. to Feb.

Swaar, large, lemon, yellow, with dark dots, flesh tender, rich, juicy; excellent. Nov. to May.

Tolman's Sweeting, medium size, pale yellow, tinged with red, flesh firm, rich and very sweet. Nov. to April.

Tewksbury Winter Blush, small, yellow, with a red cheek, flesh firm, juicy and high flavor; long keeper. Jan. to July.

Twenty-Ounce, a very large, showy, striped apple of medium flavor; an excellent market fruit.

Vandervere, size medium, yellow, striped with red, with deep crimson cheek, flesh yellow, juicy, crisp and fine. Oct. to Mar.

Wagner, size medium to large, bright red in the sun, flesh firm, subacid; excellent; very productive. Dec. to May.

Wellford's Yellow, rather small, roundish, pale yellow, with faint red streaks, flesh yellow, very juicy, aromatic flavor. Jan. to June.

Wine Apple, medium to large. nearly round, deep red on a yellow ground, flesh yellowish white, juicy, crisp; an abundant bearer. Oct. to March.

Wine Sap, large, roundish, deep red, with a few streaks, flesh yellow, firm, crisp and rich; a profuse bearer, and valuable in the South. Nov. to May.
Whitescarver, largest size, oblong, greenish yellow, of first quality; good grower and bearer, superb. Oct. to Jan.

Winter Queen, large to very large, deep crimson in the sun, flesh yellowish, pleasant, subacid flavor; a vigorous tree, bearing young and abundantly, resembles Buckingham. Nov. to Feb.

York Imperial, large, oblate, whitish, shaded with crimson, flesh yellowish, crisp; fine flavor. March to April.

**CLASS FOURTH—CIDER APPLES.**

Hewes’ Virginia Crab, quite small, dull red, dotted with white specks, esteemed for cider in Virginia and other Southern States; a prodigious bearer. Nov. to June.

Waugh’s Crab, large, bright red, flesh firm, juicy, acid; in spring is an excellent eating apple. Jan. to June.

**CLASS FIFTH—APPLES FOR ORNAMENT OR PRESERVING.**

Golden Beauty, size medium, yellow with a red cheek.

Red Siberian Crab, small, about an inch in diameter, yellow with crimson cheek. Sept. to Nov.

Large Red Siberian Crab, larger than the above, similar in quality and appearance. Sept. to Nov.

Yellow Siberian Crab, nearly as large as the last, of a rich amber or golden yellow color.

Hampton’s Siberian Crab, fruit large for a Siberian Crab, deep rich crimson, blotched and lightly striped.

Hyslop’s Crab, one of the largest in this class, deep crimson, with bloom very showy.

Transcendent Crab, good size, bright red, very showy and handsome; very popular variety.

Cherry Crab, fruit small, light yellow spotted and shaded with red, hangs long.

Currant Crab, fruit small, borne in clusters like currants, light red slightly striped with deep red.

Sweet Crab

Malus Edulus, new, from Japan.

Floribunda, a beautiful Japanese Crab, with lovely flowers, and very ornamental small fruit.

Toringo Major, a Japanese Crab, with handsome flowers and medium sized fruit.

Tenori Carnea. (Japanese,) large, flesh colored flowers, medium sized fruit, very handsome.

Oblong Crab, dark crimson, beautiful.

Marengo, large for this class, bright red on yellow ground.

Chicago, small, with vermilion cheek; juicy and rich.

Paul’s Imperial, a cross between Red Astrachan and Siberian Crab, (new.)

**ADDITIONAL VARIETIES OF APPLES.**

I have here placed several new Southern varieties, together with many celebrated Northern sorts, that have not been sufficiently tested in this latitude, as well as others suited to certain localities. Doubtless many here included will yet be found worthy of a place on the select list.

SELECT PEARS.

The number of varieties of this fruit, both of American and Foreign origin, has increased so rapidly within the last few years, that it has become necessary to limit the kinds cultivated. The following list comprises such as have been well tested and proved, any of which the amateur may plant without risk of disappointment.

Those designated by an * are of American origin.

Price—Dwarf Trees, on Quince 1 year old, 25 cts. each; $15 per 100.

" " 2 and 3 years old, 30 cts. each; $20 per 100.
" " Extra sized trees, extra price.

Standard Trees, on Pear 2 and 3 years old, 50 cts. each; $30 per 100.
" " Extra size, extra price.

CLASS FIRST—SELECT SUMMER PEAR.

Ananas d’Ete, a large handsome fruit; ripe about Sept.

Bartlett, large, buttery, melting with a tender flesh: a very popular variety.

Tree a vigorous grower, an early and profuse bearer. Aug. to Sept.

Beurre Giffard, medium size, melting and very juicy, with a delicious flavor; one of the finest early Pears. July to Aug.

Beurre Assomption, large, oblong, pyriform, obtuse, yellow, dotted and marbled with red in the sun. Flesh white, melting, juicy, sweet; a fine new Pear. July.

*Bloodgood, medium size, melting, buttery and rich; an excellent American Pear of first quality; good grower and abundant bearer. July.

*Brandywine, medium size, yellow and russet, melting, buttery and rich, a vigorous grower, and productive. Aug.

*Clapp’s Favorite, a new large Pear resembling the Bartlett; pale yellow with a crimson Cheek and brown dots; very productive; a promising new variety. Aug.

*Dearborn’s Seedling, below medium size, melting and delicious; an excellent early Pear. July to Aug.

Doyenne d’Ete, below medium size, melting, sweet and delicious; a beautiful early fruit, a vigorous grower and profuse bearer. Beginning of July.

*Edmunds, a large roundish fruit, pale yellow, flesh buttery and rich; a vigorous grower and good bearer. Sept.

Elizabeth, (Manning’s,) medium size, bright yellow with a red cheek, juicy melting, sprightly, perfumed flavor. July.
*Hosenschenck, large, bright yellow, flesh tender, juicy, melting. Last of July.
*Kingsessing, (Leech’s,) large, greenish yellow, rich, buttery and delicious; a vigorous, strong grower. Aug.
*Kirtland, medium size, cinnamon russet, melting, sweet and juicy; a vigorous grower and productive; a seedling from Seckel. Aug.
Madeleine, (Citron des Carmes,) medium size, yellowish green, juicy, melting, sweet, perfumed flavor; one of the finest early Pears; a vigorous grower and productive. July.

(1.) Beurre d'Assomption. (2.) Clapp's Favorite.

*Ott’s Seedling, small to medium size, yellow, melting, juicy and fine; a seedling from Seckel; a vigorous grower and free bearer. Aug.
*Osband’s Summer, medium size, bright yellow, juicy, melting, sugary and fine; good grower and productive. Beginning of August.
*Pinneo, (Boston,) medium size, yellow, with a red cheek, juicy, sweet and pleasant; a vigorous grower and productive. Aug.
Rostiezer, medium size, yellowish green, juicy, sweet and high flavored; a vigorous grower. Aug.
Sam Brown, a new Maryland Seedling of the finest quality; fruit above medium, very delicious, vigorous grower and free bearer. Early in Sept.
Souvenir du Congress, fruit very large, resembling the Bartlett, skin smooth, yellow at maturity, washed with bright carmine on the sunny side. Flesh like the Bartlett, but less musky. The finest Pear of recent introduction. Aug.
Tyson, above medium size, deep yellow with a crimson cheek, juicy, melting, very sugary and aromatic; a vigorous grower, an excellent summer Pear. Aug.
Washington, moderate size, pale yellow, delicious flavor. Sept.

**Class Second—Select Autumn Pears.**

Baronne de Mello, medium size, russety, melting, juicy and high flavored; a vigorous grower; productive. Sept. and Oct.
Buffum, medium size, deep yellow, suffused with bright red; flesh buttery, juicy, sweet and excellent; tree a very vigorous grower. Sept.

Fondante de Noel.

PYRUS MAULEI.

This desirable new fruit has been introduced into England from Japan; it is allied to the Japan Quince. The fruit is the size of a moderate Quince of a bright apricot-color, and makes a rich marmalade. The flowers which are produced in great profusion are of a most brilliant orange-scarlet color. It is one of the most beautiful flowering trees of recent introduction, as well as a valuable fruit. Small plants 50 cts. to $1 each.
SELECT CHERRIES.

The Cherry likes a light, dry, gravelly soil, on which few other fruit trees would succeed. Standard trees are admirably adapted for shade in gardens or yards, where, at all stages of growth, they are exceedingly beautiful. Dwarf trees, branched from the ground, are the most suitable for the fruit garden.

PRICE—Standard trees (on Mazzard Stocks,) 25 to 50 cts. each.
Dwarf trees (on Mahaleb Stocks,) 25 to 40 cts. each.

CLASS FIRST—HEART CHERRIES.

Varieties marked with an * are of American origin.

Belle d’Orleans, large, pale red and white, flesh tender, sweet and delicious; the best early cherry. Beginning of June.

Black Eagle, large size, black, flesh tender, juicy, rich and sweet; an abundant bearer. End of June.

Black Tartarian, very large, sweet, rich and good, a beautiful grower and profuse bearer; one of the finest cherries. Middle of June.

*Coe’s Transparent, medium size, pale amber, melting, tender and juicy; vigorous and productive; an excellent cherry. Middle of June.

*Delicate, (Kirtland,) large, amber and red, juicy, sweet and rich. Middle of June.

*Downer’s Late Red, medium to large, lively red mottled with amber in the shade, tender, melting and sweet; a free grower and profuse bearer. July.

Early Lyons, very large, light red and yellow; the largest early cherry; ripens after Early Purple Guigne; juicy and rich; a beautiful cherry.

Early Purple Guigne, medium size, purple, tender, juicy, with a rich, sweet flavor; a vigorous grower and good bearer. End of May.

Early White Heart, medium size, yellowish with red cheek; tender, sweet and pleasant. Middle of June.

Early Strassen, medium size, light red, juicy, very tender and rich; a very good and distinct early cherry.

*Gov. Wood, large size, light yellow, shaded with bright red; flesh juicy, sweet, rich and delicious; a vigorous grower, and very prolific. Middle of June.

Guigne Tres Précoce, rather small, round, stalk short, dark purple, very sweet and one of the earliest of all, if not the earliest; a great bearer.

Knight’s Early Black, large, black, flesh tender, juicy, rich and excellent; tree a good grower and profuse bearer; ripe after Early Purple Guigne.

*Ohio Beauty, (Kirtland,) large, light ground shaded with red, handsome, tender and fine; vigorous and productive. Beginning of June.

*Sparhawk’s Honey, medium size, light red, juicy, sweet and delicious; tree vigorous grower and profuse bearer. Beginning of June.

White French Guigne, large, creamy white, flesh tender, juicy and melting; tree vigorous and productive. End of June.

Werder’s Early Black, large, juicy, sweet and good; an excellent early cherry.

CLASS SECOND—BIGARREAU CHERRIES.

Bigarreau Noir Hatif, (Early Black Bigarreau), medium size, jet black; sweet, rich and good; good grower, and productive. Beginning of June.

Bigarreau or Yellow Spanish, large, pale yellow with a red cheek; flesh firm, juicy and delicious; a beautiful light cherry; a vigorous grower and profuse bearer. Middle of June.

Bigarreau Jaboulay, large, light red, remarkably rich and delicious; the earliest Bigarreau known, 14 days before May Duke.
Bigarreau White, (Ox Heart), largest size, yellowish white marbled with red; flesh half tender and luscious. Beginning of June.

Buttner's Yellow, medium size, pale yellow; flesh juicy, sweet and good; a vigorous grower and profuse bearer. End of June.

*Black Hawk, (Kirtland), large black; flesh firm, juicy, rich and sweet; tree vigorous and productive. Beginning of June.

Early Black Bigarreau, large black, rich and good; better than Knight's; a valuable new cherry.

*Cleveland Bigarreau, (Kirtland), large, yellow with bright red; flesh juicy, sweet and rich; a very vigorous grower and productive. Middle of June.

Elton, (Bigarreau Couleur de Chair), large, pale yellow with a marbled red cheek; flesh tender, juicy and luscious; tree vigorous and productive; a superb cherry. Beginning of June.

Frogniore Early Bigarreau, a new early cherry, the earliest of its class; brilliant red cheek dotted with yellow; tender, juicy and rich flavor.

Monstreuse de Mezel, or Great Bigarreau, very large, dark brown; flesh firm and juicy; tree a free grower and productive. End of June.

Large Black Bigarreau, very large, black; flesh firm, juicy and rich; one of the finest.

Napoleon Bigarreau, (Holland Bigarreau), largest size, pale yellow with a bright red cheek; flesh firm, juicy and sweet; tree very vigorous, and great bearer; a very beautiful cherry. Middle of June.

*Rockport Bigarreau, (Kirtland), large, pale amber with light red cheek; flesh half tender, sweet and rich; tree exceedingly vigorous and fine. Beginning of June.

Tradescant's Black Heart, (Elkhorn), very large, black, firm, juicy and good; tree very vigorous and productive. End of June.

Class Third—Duke and Morello Cherries.

Belle de Choisy, medium size, amber shaded and mottled with red; flesh tender; sweet and rich; a handsome grower. Beginning of June.
Belle Magnifique, large, bright red; flesh juicy, tender, subacid flavor; tree moderate grower and productive; a beautiful and excellent late cherry. End of June.

Carnation. large, light red, tender, juicy, subacid flavor; tree a free grower and abundant bearer. Beginning of July.

Donna Maria, medium size, dark red, tender, juicy and rich; tree of moderate size, very productive. End of June.

Early Richmond or Montmorency, medium size, bright red; flesh melting, juicy, rich, acid flavor; excellent for cooking. Beginning of June.

Empress Eugenie, a new variety of May Duke from France; much larger, earlier, and comes into bearing sooner; ripens in this latitude the end of May; the finest of all early cherries.

Late Duke, large, rich, dark red; flesh tender, juicy, subacid; forms a beautiful dwarf. Beginning of July.

May Duke, large, dark red; flesh juicy, rich, subacid, excellent; a very popular cherry in all countries; excellent. End of May.

Montmorency Bretonneau, a large acid cherry; ripens after Early Richmond; fine.

Montmorency Ordinaire, a fine large acid cherry, larger than Early Richmond, and later; a very productive, hardy, valuable variety.

Morello English. (Imperial), large, dark red nearly black; flesh tender, juicy, subacid, tree small with slender branches. July.

Plumstone Morello, large, dark red; flesh tender, juicy, sprightly flavor; tree a slow grower, makes a handsome pyramid; productive; very valuable. July.

Reine Hortense, (Monstreuse de Bavay), large, bright red; flesh tender, juicy, sweet and delicious; tree vigorous and prolific; an excellent new cherry. End of June.

Royal Duke, large, dark red; very juicy and agreeable; tree a good grower, and prolific; succeeds May Duke.

Vail's August Duke, large, bright red; flesh tender, subacid, rich; tree a vigorous grower and very productive. End of June.

**NEW CHERRIES.**

*Price 50 cents each.*

Bohemian Black Bigarreau, very large, black, rich and good; a fine cherry.

Early Lmahnie, (Big,) large dark purple, like Early Purple Guigne, but a week earlier; rich and excellent; the earliest cherry.

Duchesse de Pallnau, large, a robust growing variety of May Duke of excellent quality.

Early Rivers, (Big,) large, black, early and rich; a seedling from Early Purple Guigne.

Golden Bigarreau, very large, bright yellow, juicy and very good.

Ludwig's Bigarreau, large, pale red, rich and very good.

*Luelling or Black Republican, very large, black, flesh like a Bigarreau, said to be a cross between Black Tartarian and Napoleon Big; a very fine new cherry.

Nouvelle Royal, a hybrid between Kentish and May Duke; the latest and largest of all the Duke cherries.

Olivet. This is a large globular very shining deep red cherry. The flesh is red, with a rose colored juice, tender, rich and vinous with a very sweet subacidulous flavor. It ripens early in June and continues a considerable time without losing its quality. It possesses the fertility of the best of the Duke tribe, and is perhaps the largest of that class.

Planchoury, (Morello,) medium size, a very excellent and free bearing sort, and one of the latest.

Reine Hative, (new)

Transparente de Meylan, (new)
This noble Cherry was introduced into England by Mr. Rivers under the name of Bigarreau Noir de Schmidt, who has not been able to trace its history beyond the Société Van Mons, of Belgium, from which he received it. It is by far the largest of all the Black Bigarreau Cherries.

As will be seen from our engraving, the fruit is produced in clusters, and is of a large size, round and somewhat oblate. The skin is of a deep black color, and there is a large style mark on the apex. The stalk is stout, 2 inches long, and rather deeply inserted; flesh, dark, tender, and very juicy, with a fine flavor. The stone is very small for the size of the fruit.
**ADDITIONAL LIST OF CHERRIES.**

*American Amber,*  
*Belle Agathe,*  
*Bowyer's Early Heart,*  
*Bigarreau Large Black of Savoy,*  
*Bigarreau Gros Couret,*

*Black Heart,*  
*Champagne, (Downing's),*  
*Downton,*  
*Dauphine,*  
*Florence,*  
*Guigne Tres Precoce,*  
*Hovey,*  
*Kirtland's Mary,*  
*Late Purple Guigne,*  
*Jeffries' Duke,*  
*Manning's Mottled,*  
*Kirtland's,*  
*Red Jacket,*  
*River's Early Amber,*  
*Sweet Montmorency,*  
*The Doctor,*  
*Utah Hybrid,*

**SELECT PLUMS.**

This is a very valuable and useful fruit, both for dessert and culinary purposes. In some soils it suffers severely from the attacks of the curculio. Injury from this pest may be avoided by a comparatively small amount of attention. As soon as the fruit commences setting, the trees should be jarred daily, and the insect destroyed. Pursue this until all danger of injury is past, and good crops will follow.

**Price**—One year old, 25 cents each; two and three years, 50 cents each.

Those designated by an * are of American origin.

Admiral de Rigney, medium, ovate, greenish yellow, flesh very juicy, very sugary and highly perfumed; an excellent plum. Aug. and Sept.

Belle de Louvain, a large and beautiful plum, purplish red, flesh yellow; fine for preserves.

Belvoir, large, roundish, yellow, flesh yellow, very juicy, sugary and very good. Aug. and Sept.

*Bleeker's Gage,* medium to large, roundish, oval, yellow, flesh juicy and rich; tree a good grower and prolific. Beginning of Aug.

Bradshaw, (Large Black Imperial), very large, dark violet red, juicy and excellent; tree vigorous and productive.

Brignai's White Gage, fruit large, of first quality; a vigorous grower.

Cloth of Gold, (Esperen), medium size, oval, bright yellow, juicy and agreeable; free stone. Beginning of Aug.

Coe's Golden Drop, large, oval, light yellow, flesh firm, rich and sweet; a very handsome and valuable plum. Beginning of Sept.

**Coe's Golden Drop.**

Coe's Late Red, medium size, round, purplish red, juicy and agreeable; free stone. End of Sept.

Coe's Violet, this possesses all the fine qualities of Coe's Golden Drop; the color of fruit a fine violet.
*Columbia, large, roundish purple, flesh juicy, rich and good, free stone; tree vigorous, and a abundant bearer. Sept.  
*Dennison's Superb, large, round, yellowish green, flesh juicy, rich and good, free stone; tree a free grower and prolific. Beginning of Aug.  
Diamond, enormously large, oval, purple; unfit to eat uncooked, but one of the finest culinary plums known; vigorous and productive. End of Aug.  
*Duane's Purple, very large, oval, reddish purple, flesh juicy and sweet; tree vigorous and prolific. End of Aug.  
Decaisse, round, slightly oblong, green, flesh very juicy, sugary and rich; a very large variety. Sept. to Oct  
Dumiron, a fine cooking plum; exceedingly productive.  
Early Bayv, greenish yellow, tinged with purple, flesh yellow, juicy and sweet. Aug.  
Fellemberg, (Quetsche d'Italie,) medium size, oval, deep purple; a valuable late plum; very productive. End of Aug.

**Fellemberg, (Quetsche d'Italie.)**

Fulton, fruit large, roundish oval, whitish yellow, marbled in the sun, flesh golden yellow, juicy, sugary, vinous, excellent. Early Oct.  
*General Hand, very large, yellow, handsome; tree a free grower and very prolific. End of Aug.  
German Prune, medium, oval, bluish purple, juicy and rich; vigorous and productive. Sept.  
Goundoin, very large, oblong, transparent violet color, fine flavor; a first rate sort. End of July.  
Golden Gage, (Lawson's,) large, oval, yellow, flesh juicy, melting and rich; tree vigorous and productive. July.  
Goliath, (Caledonia or Nectarine,) very large, roundish, purple, flesh juicy, with a sprightly flavor; tree very vigorous and productive. Middle of Aug.  
Green Gage, medium, round, green, juicy and very rich; a rather slow grower. End of July.  
*Huling's Superb, very large, round, yellowish green, rich, juicy and excellent, free stone; tree a free grower and prolific. Beginning of Aug.  
Imperatrice, Ickworth, medium size, roundish oval, purple, rich, juicy and excellent; a good keeper. Sept.  
*Imperial Gage, large, oval, greenish, flesh juicy, rich and excellent, free stone; a remarkably free grower and productive. Beginning of Aug.  
*Jefferson, large, oval, yellow spotted with red, juicy, rich and delicious; very productive. Beginning of Aug.  
Kirke's, large, roundish oval, purple, rich, juicy and excellent. Beginning of Sept.  
Lafayette, large, oval, purple with a dense bloom, rich, juicy and excellent. Sept.  
*Lawrence's Favorite, large, roundish, yellowish green, juicy, rich and delicious, very prolific. Beginning of Aug.  
*Lombard, medium size, oval, violet red, flesh juicy, rich and good; an abundant bearer. Middle of Aug.  
Magnum Bonum Yellow, very large, oval, yellow, excellent for cooking; tree vigorous and productive. Middle of Aug.  
Magnum Bonum Red, large, oval, violet red, an excellent cooking plum; tree vigorous and prolific. Middle of Aug.
Mamelone, medium size, greenish yellow, rich, juicy and excellent; shape very peculiar, with a neck like a pear; tree vigorous and prolific. End of July.

*McLaughlin, large, round, greenish yellow, flesh juicy, sweet and luscious; vigorous and productive. Middle of Aug.

*Orange, very large, oval, bronze yellow, flesh acid; tree vigorous and productive. Aug.

*Orleans, Smith’s, very large, oval, reddish purple, flesh firm, juicy and rich; tree a free grower, and productive. Aug.

Pond’s Seedling or Fonthill, enormously large, oval, bright red, valuable for cooking; a very attractive fruit; tree very vigorous, and an abundant bearer. Sept.

*Purple Favorite, medium size, purple, flesh juicy, melting and good. Beginning of Sept.

Prince Englebert, very large and long, deep purple; rich and excellent. Aug.

Reine Claude de Bavay, (Esperence). very large, round, greenish yellow, rich and juicy; tree vigorous and prolific; a beautiful new plum. Sept.

Shropshire Damson, medium size, dark purple; the finest of Damsons. Sept.

Sultan, (new), large, round, deep purple, and of excellent flavor, vigorous, and very prolific. Aug.

Transparent Gage, large, roundish, oval, greenish yellow marbled with red, flesh transparent, rich, juicy, and of high excellence; the richest of plums; very robust and vigorous. Sept.

Victoria, (Sharp’s Emperor), very large, oval, red, sweet and juicy; an excellent cooking plum; tree vigorous and productive. Sept.

*Washington, very large, roundish, oval, yellow, juicy, sweet and excellent; tree very vigorous and prolific; one of the finest plums. Beginning of Aug.

Wangenheim, medium size, dark blue, oval, first quality; a very superior plum. *Yellow Gage, (Prince’s), large, oval, yellow, juicy, rich and good; tree very vigorous, and a profuse bearer. Beginning of Aug.

**ADDITIONAL VARIETIES OF PLUMS.**

Some of the following are new and untested; others are adapted for certain latitudes.

Bryanstone Gage,  Lucombe’s Nonsuch,  Reagle’s Ancient City,
Belle de Septembre,  Mirabelle,  Reagle’s Gage,
De Montfort,  Mitchelson’s,  Reagle’s Union Purple,
Fotheringham or Belgian  Oullin’s Golden Gage,  Royal de Tours,
Purple,  Peach or Prune Pecche,  Reine Claude Brauneau,
Fine Late Red,  Peter’s Yellow Gage,  Richland Plum,
Frost Gage,  Prune de Agen or Robe  St. Catharine,
Jaune Native,  de Sergent,  St. Martin’s Prune,
Guthrie’s Apricot,  Precoce de Bergthold,  Schenectady Catherine,
Italian Prune,  Quackenboss,  Woolaston Black Gage.

**NATIVE VARIETIES.**

Wild Goose, a variety of our native Chickasaw Plum, fruit about the size of Green Gage, skin purple with a blue bloom, flesh yellow, rather firm, sweet; succeeds admirably in this latitude, bearing abundant crops, on quite young trees; not liable to the attacks of the curculio; a variety of great value. July.

Bassett’s American, curculio proof, a rapid vigorous grower and profuse bearer, fruit small, deep crimson with a heavy white bloom, sweet, rich and refreshing; skin thick, and until cooked somewhat tough. (which protects it completely from the attacks of the curculio), but entirely free from any astringency or unpleasant taste; ripens end of September, and can be shipped any distance.”

Yosemite, a productive variety, curculio proof, and bears an annual crop.

De Caraduc, medium, yellow, nearly covered with red, melting and sweet; vigorous grower, productive.
SELECT APRICOTS.

This valuable fruit succeeds as well in this region as in any part of the Union.

PRICE—25 to 35 cents each.

Alsace, very large, rich and juicy, of the Moorpark family, the largest of that race, tree robust.

Blenheim or Shipley, medium size, juicy and excellent, ripens about ten days after Moorpark; tree very hardy.

Breda, small, round, orange, marked with red in the sun, juicy, rich and vinous; tree hardy and productive. Middle of July.

Blanchet, (new,) large, ovate, deep orange red, flesh fine, melting, perfumed; very fine, good, and very early. End of June.

Early Golden, (Dubois,) small, pale orange, flesh juicy and sweet; tree very hardy and prolific. Beginning of July.

Gloire de Porrtales, (new,) medium, fine shape, fine color, very juicy and excellent; tree vigorous and a good bearer. July.

Golden Drop, (River's,) new, small, bright orange and crimson, melting, with a delicious flavor; tree vigorous and prolific. Beginning of July.

Hermiskirke, large, rich and juicy, very nearly allied to the Moorpark; tree more hardy.

Jamuccet large and fine; late in ripening, very vigorous.

Kaisha medium size, juicy, sweet and agreeable, flesh transparent, early orange with a red cheek.

Large Early, large, orange with a red cheek, flesh juicy, sweet and rich; tree vigorous and prolific. Middle of July.

Moorpark, largest size, yellow with a red cheek, juicy, rich and excellent; one of the best; very productive.

Musch Mu-ch, small, juicy and agreeable, flesh transparent; a very nice early apricot.

Orange, medium size, orange with a red cheek; tree hardy and productive. Middle of July.

Oullin's Early Peach, large, juicy, rich and excellent; very early and fine.

Peach or Grosse Peche, very large, rich, juicy and excellent; one of the finest apricots.

Pine Apple, (Ananas of the Dutch,) a variety of the Large Early; a very large and distinct variety, rich and juicy.

Précocé de Montplaisir, large, deep orange with russet spots, flesh red, very good. The earliest of all the large apricots; very valuable.

Royol, large, rich and juicy an excellent hardy sort. Middle of August.

Schiraz, (new,) a very fine apricot.

Syrian, (new,) very rich and fine.

St. Ambroise, large, juicy and agreeable; ripens a few days after the Large Early, and is one of the finest apricots.

Tardive d'Orleans, large, juicy and good. Beginning of August.

Viard large, rich, juicy and excellent; an early variety of the peach apricot; tree hardy.

SELECT NECTARINES.

This very delicious fruit is extremely liable to the attacks of the curculio. It is nothing more than a variety of peach with smooth skin.

PRICE—25 cents each.

Balgowan, fruit very large, pale green, mottled with red, bright red on sunny side, melting, rich and fine. Beginning of August.

Boston, large, bright yellow, with a red cheek, flesh sweet and rich, freestone. End of Sept.
Clermont, medium size, pale green with a dark red cheek, melting, sweet and good. Beginning of Aug.
Downton, large, greenish white with a red cheek, melting, rich and good; tree hardy and productive, excellent, freestone.
Downton, large, white with a red cheek, very high flavored.
Elruge, medium size, greenish yellow, with a dark red cheek, melting, rich, juicy and excellent; one of the best.
Hardwicke Seedling, large, pale green with a red cheek, melting, rich and excellent; tree hardy and productive.
Lord Napier, (Rivers,) medium, pale cream with a red cheek, flesh melting.
Murray, medium size, melung, rich and good; tree hardy.
Pitmanston Orange, large, orange with a bright red cheek, melting, juicy and good; very prolific.
Stanwick, large, deep yellow with a dark red cheek, melting, juicy and rich; a superb variety.
Templars, medium, white with bright red cheek, delicious.
Violette Hative, medium size, melting, juicy, rich and excellent.
Victoria, very large and delicious, greenish yellow, crimson on the sunny side; a seedling from Stanwick, very fine.

SELECT PEACHES.

Peaches succeed to perfection in this region. Here "yellows" and other diseases from which they suffer in Northern States are unknown. The pits from which they are raised, and the stock from which they are budded are alike of pristine vigor; a point planters should bear in mind.

PRICE—25 cents each, $10 per 100.

CLASS FIRST—FREESTONES WITH WHITE FLESH.

Amsden June, good size, color red, flesh juicy and melting; three weeks earlier than Hale's Early, and ripe with Alexander's Early; July 4th.
Amelia, very large white, covered crimson, juicy, melting and sweet, and of high flavor; one of the finest second early peaches; ripens in Washington Aug. 10.
Brugg's Red May, a new Californian peach of fair size and bright red color; said to be one of the earliest grown.
Bilyeu's Late October, (Bilyeu's Comet,) a very late peach, two to three weeks later than Smock and Salway, large size, white flesh with a beautiful blush cheek; freestone and an excellent shipper, it having been successfully sent to Europe; tree vigorous grower and very productive. Beginning of Oct.
Bower's Early, a seedling from Frederick, Md., medium size, first quality, deep crimson all over, adheres slightly to the stone. Will likely prove one of our earliest and best peaches; ripe July 10.
Cumberland, a new early peach, said to be the largest and earliest of all the new varieties.
Crockett's Late White, very large, late, oblong, skin greenish white, red in the sun; a fine late variety. End of Sept.
Early Beatrice, medium size, marbled, red cheek, flesh melting and very juicy, carries well, ripens two weeks before Hale's Early; the earliest peach known.
Early Canada, (High's), medium size, bright red with a dark red cheek, fine flavor; recommended as one of the earliest peaches.
Early Louise, medium size, bright red, melting, very juicy and excellent; nearly as early as Early Beatrice; the very finest of early peaches. Ripe July 12th.
Early Rivers, large, color pale straw, with a delicate pink cheek, flesh melting, with a rich, racy flavor; an excellent early peach.
Early Newington Free, medium to large, white with a red cheek, high flavored; ripens immediately after Early York.

Early Red Troth's, medium size, bright red cheek, flesh red at the stone, juicy, sweet and good. End of July.

Early Tillotson, medium to large, white nearly covered with red, flesh melting, juicy, rich and excellent. Early in Aug.

Early York, (Serrate Early York), medium to large, greenish white, covered in the sun with purplish red; juicy, rich and excellent. Beginning Aug.

Early Alexander, medium size, richly colored and delicious flavor, three weeks earlier than Hale's Early; the earliest of all peaches. Ripe July 4th.

Engle's Downing, (Cling), this is said to be the earliest of all peaches, ripe before Wilder and Saunders; first quality and finely colored. Ripe July 4th.

Engle's Saunders, (Cling), a few days after Downing and two weeks in advance of Hale's; first quality and finely colored. Ripe July 10th.

Engle's Wilder, (Cling), this is larger than Downing and Saunders, a little later, ten days earlier than Hale's; first quality and finely colored. Ripe July 4th.

Fleitas or Yellow St. John, medium to large, roundish, inclined to oblong, skin creamy white, with a slight blush, flesh white, tinged with red next the stone; juicy, melting, sweet, rich and excellent Aug. 12th.

Fox's Seedling, round, white with a red cheek, melting, juicy, sweet and good. Middle of Sept.

George the Fourth, large, white with a red cheek, flesh pale, juicy and delicious; tree vigorous and prolific; an excellent peach. Middle of Aug.

Governor Garland, from Arkansas, recommended as the earliest of peaches, large, bright red cheek; delicious flavor.

Gray: Rare Ripe, a very large fruit with a red cheek, ripe about the end of September; a beautiful fruit.

Grosse Mignonne, large, greenish yellow mottled with red, with purplish red cheek, flesh melting, juicy and rich; tree vigorous and prolific. Middle of Aug.

Hale's Early, medium size, nearly round, skin greenish white, covered and mottled with red, juicy, rich and sweet; early and good.

Heath Free, largest size, greenish white with purplish red cheek, melting, juicy, subacid flavor; tree very vigorous and productive Middle of Sept.

Honeywell's Early, fruit medium, nearly globular, greenish white nearly covered with light and dark red, flesh whitish, juicy, half melting, sweet, rich, vinous; adheres partly to the stone; one of the earliest new peaches.

Hynes Surprise.

Jarrett's Late White, an immense late peach. "It is nine inches in circumference, nearly round, greenish white with cream on sunny side, flesh white, juicy, rich, slightly acid; ripens with Smocks or a little later; one of the finest peaches."

Keyport Late White, large, slight blush on cheek, white flesh; great bearer; fine for canning, ripens with Smocks.

Lord Palmerston, a magnificent, large, very late peach, has been grown 12½ inches in circumference and weighed 17 ounces. It is one of Mr. Rivers' Seedlings. Fruit very large, of a rather pale color, having a little red on the sunny sides, flesh firm and richly flavored.

Large Early York, large, white with a red cheek, flesh juicy and delicious; tree vigorous and a profuse bearer, an excellent variety. Middle of Aug.

La Grange, large, greenish white, slightly reddened in the sun, flesh pale, juicy, rich and sweet; a very desirable late peach. Beginning of Oct.

Morris White, medium size, creamy white, tinged with red in the sun; flesh juicy and delicious; tree a good grower and prolific; excellent for preserving. Beginning of Sept.

Moore's Favorite, larger, but similar in appearance to Old Mixon, a few days earlier; one of the very finest peaches of its season. End of Aug.

Mountain Rose, larger and superior to Troth's and ripens with that favorite variety; very popular.

Musser, one of the new early peaches.
From Gardener's Chronicle.

LORD PALMERSTON PEACH.
Old Mixon Freestone, large, greenish white with a red cheek, flesh pale, juicy and rich; tree vigorous and prolific; an excellent variety. End of Aug.

Rareripe, Late Red, large, greyish yellow, with a dull deep red cheek, flesh juicy, melting and rich; tree vigorous and productive; a beautiful and valuable peach. Beginning of Sept.

Shipley's Late Red, large size, white flesh with a beautiful blush; one of the most beautiful and valuable of our late peaches; tree vigorous and productive. Beginning of Oct.

Silver Medal, large, white ripening with Smocks; tree hardy and a great bearer; a very desirable late peach.

Snow Peach, (Kolb,) white wood, white bloom, white fruit, good size; the finest for canning. Middle of Sept.

Steadily, very large, fine flavored and very late peach, color greenish white. "Larger than La Grange or Heath Cling and ten days later."

Stump the World, very large, creamy white with a bright red cheek, flesh juicy and high flavored; very productive. Middle of Sept.

Thurber. "Fruit large to very large often measuring ten inches in circumference, round or slightly oblong, creamy white, marbled with carmine, flesh white, juicy, sweet and exquisite." End of Sept.

Tuckahoe Late, very large, white, freestone peach, said to be two weeks later than Smocks.

Ward's Late Free, large, white with a beautiful crimson cheek, flesh juicy, melting, rich and excellent; tree vigorous and productive. Beginning of Oct.

Waterloo, a new early peach from Western New York, recommended for its earliness and large size.

William's Large Free.

CLASS SECOND—FREESTONES WITH YELLOW FLESH.

Beer's Smock, large, yellow, very fine, a seedling from Smock's; very productive, a very valuable variety. End of Sept. and 1st of Oct.

Brandywine. "A seedling of Crawford's late and valuable for its large size, fine appearance, good quality, lateness and market value. Fruit larger than its parent and ripens ten days later; tree a strong grower and productive."

Christiana. "Very large, yellow with a fine blush similar to Reeve's Favorite, ripens just before Smocks." A fine variety.

Conklin, golden yellow, marbled with crimson, large and handsome; ripens after Crawford's Early.

Crawford's Early Melocoton, very large, oblong, yellow with a fine red cheek, flesh melting, sweet, rich and very excellent; tree vigorous and very productive, a splendid and excellent early yellow peach. Middle of Aug.

Crawford's Late Melocoton, very large, skin yellow with a fine dark red cheek, flesh melting, sweet, rich and excellent; tree vigorous and very fruitful; a magnificent peach. Middle of Sept.

Foster, very large, round, fully as large as Crawford's Early and superior in flavor; ripens a few days before Crawford's Early.

Geary's Hold On, a very late peach, weighing from twelve to sixteen ounces; ripening after Smock and of fine quality.

Hance's Golden Rareripe.

Harker's Seedling, fruit large, roundish, mostly covered with red, flesh sweet and juicy. Beginning of Sept.

Leatherbury's Late. "A fine, large, late peach, ripening after smock and Salway; measures from eight to eight and a half inches in circumference, and are of a palish yellow color, tinged with a rich scarlet over the largest portion of the peach; exceedingly juicy and rich."

Mary's Choice, a magnificent large yellow peach, larger than Crawford's Late; an extra fine variety. Middle of Sept.

Nanticoke, very large, yellow with a deep red cheek, hardy and productive, ripens a week after Smocks.
Richmond, large size, skin fine yellow, mottled and shaded with dark red, fine quality; ripens a few days after Crawford's Early.

Red Cheek Melocoton, large, yellow with a red cheek, flesh juicy, melting, rich and vinous; tree hardy and very prolific. Middle of Sept.

Reeves' Favorite, large oval, yellow with a fine red cheek, flesh juicy, melting and vinous; tree hardy and productive. Beginning of Sept.

Salway, large, yellow with a brownish red cheek, very productive, ripens just after Smock's; a fine late peach.

Smock's Free, large, orange yellow, mottled with red, flesh moderately juicy and rich; tree vigorous and prolific End of Sept. and beginning of Oct.

Susquehanna, very large. rich yellow with a beautiful red cheek, flesh juicy, sweet, rich and vinous; tree very vigorous and productive; a magnificent large yellow peach. Beginning of Sept.

Yellow Rareripe, large, orange yellow with rich red cheek, flesh juicy, melting, rich and excellent. Middle of Aug.

CLASS THIRD—CLINGSTONES.

Chinese Cling, large, globular, creamy white, marbled with red, flesh juicy, melting, rich and vinous; tree vigorous and productive. Beginning of Sept.

Heath Cling, very large, creamy white, with a faint tinge of red in the skin; flesh very tender, juicy, melting, rich and luscious; a superb cling peach. Beginning of Oct.

Large White Cling, large, round, skin white, dotted with red on sunny side, flesh juicy, melting, sweet and rich; tree very hardy, vigorous and prolific. End of Sept.

Lemon Cling, large, fine yellow, with a dark brownish red cheek, flesh firm, vinous, subacid flavor; tree hardy and productive. Middle of Sept.

Levy's Late Oct., a very large late peach which originated in this city. The Potomac Fruit Growers' Society have recommended it as the finest of all yellow peaches.

Magnum Bonum, a magnificent large peach, originated in Virginia; tree vigorous and prolific. The largest of all clings.

Newington Cling, medium to large, with a bright red cheek, rich flavor. End of Aug.

Old Mixon Cling, large, yellowish white with a bright red cheek, flesh juicy, melting, rich and luscious; tree vigorous and prolific; very handsome, one of the best clings. Beginning of Sept.

Stonewall Jackson, large, nearly white or creamy yellow, most delicious flavor. Ripe end of Aug.

Wilkins' or Ringgold Mammoth Cling, very large with a beautiful blush, ripens with Heath but nearly double the size; a superb cling peach.

NEW FOREIGN PEACHES.

The following new varieties have been raised by T. Rivers, England. The descriptions are his; many will undoubtedly be of great value in our climate; all are of first quality.

Albatross, a very large peach from "Princess of Wales," rich and good. Middle of Sept.

Alexandra Noblesse, very large. This fine peach is a true Noblesse in its fruit, and was raised from that sort; flesh melting, rich and excellent.

Canary, medium size, very delicious; ripe beginning of Aug.

Condor, a large peach from "Early Silver," color bright crimson, flavor piquant and rich. Early in Sept.

Comet, large, round, orange with a crimson cheek, melting, sweet and good; ripens early in October, a week or so before its parent the Salway peach.
Crimson Galande, medium size, often large, deep crimson, melting, rich and deliciously flavored; a freestone of the most hardy and vigorous habit. Middle of Aug.

Dagmar, large, melting and rich, skin very downy and of a deep crimson; very handsome. Early in Aug.

Dr. Hogg, large, firm, yet melting, often stained with red under the skin, flavor rich and sugary; a freestone, hardy, vigorous and most prolific. Beginning of Aug.

Early Albert, large, nearly oval, melting and excellent; succeeds Early York.

Early Alfred, above medium size, melting, rich and juicy; a most delicious early peach. Beginning of Aug.

Early Silver, very large, melting and rich, with a vinous flavor. Ripe beginning of Aug.

Early Leopold, medium size, pale yellow and red; very rich and excellent. Ripe beginning of Aug.

Early Victoria, a seedling from Early York, larger, earlier and harder, pale in color; very delicious; ripens with Hale's Falcon, a large peach from the "White Nectarine," pale in color, with a piquant flavor. Middle of Aug.

Golden Eagle, from a late seedling peach, from "Crawford's Late," it is rather lemon color than golden, is of a rich piquant flavor, very large, measuring 10 inches round, from potted tree; it ripens the first week in Oct.

Goshawk, a very large peach from "Cooledge's Favorite," color pale, flavor exquisite; early in Sept. This is the finest mid-season peach known.

Lady Palmerston, large, melting and very good. Skin greenish yellow, marbled with crimson, very handsome, flesh pale yellow. This fine peach ripens the end of Sept.

Lord Palmerston. See Class lst.

Magdala, size medium, color creamy white, marbled and blotched with crimson; flavor, a combination of the peach and nectarine. August.

Merlin, a large, luscious, pale peach from "Early Grosse Mignonne," flavor particularly rich. Early in August.

Osprey, a very large peach from "Pavie de Pompone," sister to "Princess of Wales," but ten or twelve days later. Beginning of Oct.

Prince of Wales, very large, color deep crimson, melting, rich and excellent; a very fine peach. Middle of Sept.

Princess of Wales, very large; one of the largest and best peaches known, and one of the most beautiful, its color cream with a rosy cheek, melting, rich and excellent. End of Sept.

River's Early York, medium size, skin marbled with red, flesh melting and juicy; very delicious.

Radclyffe, a very large peach from "Desse Tardive;" pale, flavor excellent. End of Sept. and early in Oct.

Sea Eagle, a very large peach from "Early Silver," pale in color and of high flavor; it ripens end of Aug.

Stanwick Early York, medium size, bright crimson color; the most delicious of peaches, raised between Stanwick Nectarine and Early York Peach.

The Nectarine Peach. Very large, pointed, with a smooth nectarine-like skin; flesh melting, rich and racy. It was raised from a stone of a Dutch Nectarine, and has a peculiar delicious flavor. Middle of Sept.

John, Nix's Late,

QUINCES.

PRICE—25 to 50 cents each.
Apple or Orange, large, roundish, color golden yellow; very productive. Oct.
Angers, fruit large; a vigorous strong grower.
Portugal, fruit very large, oblong, fruit lighter in color than the apple; tree
vigorously and luxuriant.
Rea's Mammoth, very large and fine, a variety of the orange.

FIGS.

PRICE—25 to 50 cents each.
Black Ischia, medium size, deep purple, sweet and rich.
Brown Ischia, medium size, rich and excellent.
Brown Turkey or Lee's Perpetual, brownish purple, large, rich and excellent.
Brunswick, brownish purple, very large and good.
Bourgasotte Grise, medium size, very rich and good.
Blue Ischia, medium size, bluish purple, rich and good.
Blue Marseilles, bluish purple, rich and good.
Castle Kennedy or Marseilles, very large, early and good.
Col di Signora Bianca, medium size, green changing to yellowish white; most
delicious.
Dauphin d'Argentoul, very large and fine; early.
Early Violet, small, brownish purple, profuse bearer.
Grosse Verte, very large, pale green, rich and excellent.
Madeline Early, large, gray skin, white flesh, productive.
Negro Largo, fruit of the largest size, jet black, marked with longitudinal
ribs; very delicious.
Pergussata, small, round, purplish brown, flesh red, very rich.
Royal Vineyard, medium size, brownish purple, very rich.
White Marseilles, large, greenish white, flesh white, sweet and luscious.
White Genoa, large, yellowish white, flesh tinted red, rich and good.
HARDY NATIVE GRAPES.

Price—25 to 50 cents each, (save new varieties marked *, price of those on application.)

Class First—Black Grapes.

Alvey, bunch medium, compact, berries small to medium, sprightly, vinous, no pulp; a good wine grape; ripens with Isabella.

Belvidere, large bunch and berry, black, similar in appearance to Hartford Prolific, but earlier and better; very vigorous, healthy and productive.

*Black Defiance, (Underhill's,) new large bunch and berry, black with a fine bloom, similar to Concord but larger and much superior in quality; a fine table grape; two weeks after Concord.

*Black Eagle, (Underhill's,) a new grape of great promise, large bunch and berry with a fine bloom; a splendid table grape of finest quality; ripens with Concord.

Black Hawk, bunch and berry large, a seedling from Concord, superior in flavor and a few days earlier.

*Bacchus, (Ricketts,) a seedling from Clinton. "Vine vigorous, hardy and very productive, bunch compact, about six inches long, shouldered, berry round, medium size, pulp half tender, juicy, color black with a fine bloom; a fine wine grape."

Cambridge, (Hovey,) This grape resembling Concord, but with more oval berries, bunches large and shouldered, berries large, skin thin, covered with a delicate bloom; flesh rich, brisk and refreshing.

Clinton, bunches small and compact, berries small, round, rich and juicy; an exceedingly vigorous rapid grower; a good wine grape.

Concord, bunches large, shouldered, berries large, round, juicy, sweet and pleasant; vine very hardy, robust, vigorous and prolific, succeeds over a large portion of the Union; never mildews. End of Aug.

Creveling, bunch large, loose, flesh tender, delicate flavor, slightly vinous, sweet and good; ripens with Hartford Prolific.

Cottage, a seedling from Concord, bunch and berries similar to Concord, but a shade darker; an extremely vigorous grower and very healthy; ripens just before Concord.

Cunningham, (Long), a Southern grape of the family of Herbemont, bunch compact, medium occasionally shouldered, berries small, juicy and vinous; very vigorous and a profuse bearer; ripens late; makes an excellent wine.

Cynthiana, bunch medium, compact, shouldered, berries below medium, round with a blue bloom, sweet, spicy and juicy. This vine very much resembles Norton's Va., the berries are said to be more juicy and sweeter; one of the finest wine grapes.

Conqueror, bunches long, loose, shouldered, berries above medium, with a fine bloom, flesh juicy and sweet; a vigorous grower and healthy vine; ripens with Concord.

Elsinbourh of Ga., bunches pretty large, shouldered, berries small, round, covered with a fine bloom, a very nice little grape for the dessert, sweet and melting, without pulp.

*Early Dawn, very early and productive, and of superior quality. (new.)

Eumelan, bunches of good size, compact shouldered, berries medium, round, with a fine bloom, flesh tender, sweet and sprightly; healthy, vigorous and productive. Ripens early.

Hartford Prolific, bunch large, shouldered and compact berries, large, round, black, flesh juicy and rich; vine vigorous and productive; one of the earliest. Middle of Aug.

Herbemont, (Herbemont's Madeira, Warren,) bunch very large, shouldered and compact, berries below medium, round, dark blue, skin thin, juicy, sweet and rich; vigorous and productive.
Harris or Old House of Georgia. This Georgia grape is of the Herbeumont class. Similar to it in bunch and berry as well as of growth of vine; a desirable wine grape.

Hermann. "Bunch long and narrow, compact, berries small, round, fine bloom, moderately juicy; very vigorous and productive; ripens late. Fine wine grape."

*Highland, (Ricketts.) "Bunch eight inches long heavily shouldered, berries large roundish oval, bluish black with a blue bloom, free from pulp, rich, sweet and vinous." A very fine new grape.

Isabella. bunches large shouldered, compact, very large, oval, covered with a fine bloom, first rate quality; an excellent grape for the South. Ripens after Hartford Prolific

Isabella, bunches long, large, loose, berries large oval, black, juicy and sweet; vigorous and productive.

Ives' Seedling, bunch medium, compact, shouldered, berries above medium, black, roundish oval, flesh with some pulp, juicy and sweet; very vigorous, productive, and free from mildew; a fine wine grape. Ripens after Concord.

Lenoir, (Devereux), a southern grape of the Herbeumont family; bunch medium compact, shouldered, berry small bluish black, no pulp, flesh juicy, sweet and vinous; a fine grower; an excellent southern wine grape.

Miles. bunch small, compact, berries small, round, flesh tender, slight pulp, vinous, pleasant; one of the earliest. Valuable for the North.

*Moore's Early. "Bunch large, berry round, large, (as large as Wilder,) black with a heavy blue bloom; very early, ripening ten days before Hartford and twenty before Concord."

*Monroe, (new.) "Bunch medium to large shouldered, something like Concord, berries large, round, black covered with a thick bloom, flesh juicy, sweet and vinous. Ripens with Hartford Prolific."

*Neosho, bunch and berries about the size of Norton's compact, shouldered, pulp fleshy. sweet and juicy. This grape resembles Norton's; valuable for the South as a wine grape.

Norton's Va., bunch long, compact, shouldered, berry small with dark bluish red juice, very little pulp, sweet and brisk; vine vigorous, healthy, hardy, and productive; ripens late. One of the very best wine grapes.

North Carolina, bunch medium to large, compact, berries large oblong, slight bloom, flesh pulpy but sweet; ripens just before Concord, a vigorous grower, healthy and productive.

*Rochester, (new) "Bunch large, shouldered, very compact, berries medium to large, round dark purple with thin white blooms, flesh sweet, vinous, rich and aromatic; very vigorous grower."

Rentz. Bunch large, shouldered, compact, berry large, round black, flesh pulpy and musky, very juicy, ripens before Ives; an exceedingly vigorous grower; a good wine grape

Roger's Hybrid, Barry, (No. 43.) Bunch rather short, berries round, flesh tender, sweet and pleasant; vigorous and productive; ripens with Concord.

" Essex, (No. 41.) Bunch medium, compact, shouldered, berries large, flesh tender and sweet, with a highly aromatic flavor; a vigorous grower, healthy and prolific. Ripens early.

" Herbert, (No. 44) Bunch large, rather long and loose; berry above medium, flesh sweet and rich; productive, early.

" Merrimac, (No. 19.) Bunch medium to large, berries large, sweet and rich, a very fine and reliable variety; a good grower and bearer. Ripens early in Sept.

" Wilder, (No. 4) Bunch large, berry very large, deep blue black, flesh tender, juicy and sweet; very fine. Beg. Sept.

" (No. 2.) Bunch and berry large, excellent quality; vigorous and productive; late.

" (No. 33) Bunch large, berries large; vigorous and productive,

" (No. 39.) Bunch and berries large, good quality, productive.
Talman, (Early Champion), ripe a week before Hartford Prolific, it is of finer quality, and berries adhere to the bunch. Telegraph, (or Christine), bunch medium, compact, shouldered, juicy with very little pulp, nearly as early as Hartford; vigorous and very productive. Union Village or Ontario, bunch and berry very large; very attractive in appearance, but of inferior quality. *Whitehall, a very early black grape, bunches about the size of Isabella, dark purple, thin skin, berries adhere to bunch, pulp tender, melting and sweet. Wordon, a seedling from Concord, ripens a week earlier, bunch and berry about the same size, said to be sweeter.

**Class Second—Red Grapes.**

*Brighton, (Hooker), a very fine new early grape, very large bunch, shouldered, berries red; no pulp, a delicious flavor; a very promising grape.

Catawba, bunch large, berries large, round slightly oval, deep red, flesh juicy, sweet and rich; whenever this fine old variety succeeds it has no superior; unreliable.

Delaware, bunch small, berries small, round, skin thin, light red or flesh color, flavor sweet, vinous, aromatic, fully equal to the best foreign sorts; vines slender when young, but with age free and vigorous in growth, very hardy and productive. Middle of Aug.

Diana, bunch large and compact. berries large, round, catawba color, juicy, sweet and rich; a very delicious grape, exceedingly vigorous and productive.

Iona, bunch large, compact, berries medium to large, flavor rich, sweet and vinous; very fine; whenever it succeeds it is a most desirable grape.

*Jefferson, a seedling of Rickett's, like Iona in color texture and quality, ripens with Concord; very hardy and healthy.

Mottled, bunch and berry medium, a seedling from Catawba; ripens earlier and more reliable.

Northern Muscadine, bunch medium, compact, berry medium to large, amber color or brownish red, flesh pulpy and foxy, sweet; vigorous and productive.

Roger's Hybrid, Agawam, (No. 15.) Bunches large, berries very large, dark red or maroon, pulp crisp sprightly and sweet; a handsome grape, vigorous and productive.

Goethe, (No. 1.) Very large bunch, berry large oval flavor delicious. In the North, white; South, of a light red when ripe. Ripens late; very vigorous; a fine variety for the South.

Lindley, (No. 9.) Bunch and berry medium to large, round, flesh tender, sweet and aromatic; similar to Salem, and nearly or quite as good; very productive. Early.

Massasoit, (No. 3.) Large bunch, berry large oval, purplish red, very little pulp, fine flavor; an excellent early grape. Ripens with Delaware.

Salem, (No 53.) Bunch large and compact, berry large of a light Chestnut or Catawba color; thin skin, perfectly free from hard pulp; very sweet and sprightly, with a most exquisite aromatic flavor. The best of Roger's Hybrids. Ripens just after Delaware.

(No. 5) Bunch medium, moderately compact, berry large, round, flesh tender, melting, sweet and rich; an excellent grape. Ripens with Delaware.

(No. 8.) Bunch large, berries large, amber red, quality fine, Rather late in ripening.

(No. 30.) Bunch and berries large, deep amber, fine quality. Ripens with Diana.

Walter. Bunch and berry medium, shouldered, Catawba color, flesh tender, rich and sweet, delicious flavor; vine a good grower and productive. Ripens early in Sept.
*Wyoming Red, (Wilmington Red).* "Bunch and berry double the size of Delaware, of the same color or a shade lighter, and much like it in flavor and pulp; very early, ten days in advance of Concord."

**Class Third—White Grapes.**

*Duchess.* "Color white, bunch shouldered, compact, from five to eight inches in length, and frequently weighing a pound each, quality best, sweet, juicy, rich and delicious; vine vigorous, hardy and productive."

*El Dorado, similar to Lady Washington.* In vine and fruit there exists a strong resemblance between the two varieties, the El Dorado being clear, golden yellow with no pink tinge, and with the addition of a decided aroma.

Elvira, bunch medium, shouldered, compact. berry medium, color pale green with white bloom, skin thin and transparent, pulp sweet, very tender and juicy, fine flavor. ripens about ten days after Concord; vine a vigorous, stocky grower, exceedingly productive, healthy and hardy. Said to make a superior wine.

Eva, white Concord seedling, medium size, early, fine flavor.

*Irving, (Underhill,)* bunch and berries large, no pulp; a delicious new white grape.

Lady, a seedling from Concord, bunch and berry similar, color greenish yellow covered with white bloom, pulp tender, flavor sweet and rich, slightly vinous, better flavored than Concord and ripens before it. Recommended as "the very best white grape for universal cultivation yet introduced."

*Lady Washington.* "Very vigorous hardy and productive, bunch very large, compact, generally double shouldered, berry medium to large, round, deep yellow with a tinge of delicate pink where exposed to the sun, and covered with a thin white bloom, flesh soft, tender, juicy, sweet and very good; it ripens about with the Concord. This showy and beautiful grape is a hybrid from the Concord and Allen's Hybrid, and is a promising grape for market and the amateur."

Martha, bunch medium, shouldered, berries large, greenish yellow, with a bloom; quality better than Concord from which it has been raised; a fine hardy white grape.

*Noah,* a new white grape, a vigorous grower and free bearer; promises to be a fine wine grape.

*The Prentiss. (new.)* "Bunch large, not often shouldered, compact, berry medium, yellowish green, sometimes with a rosy tint next the sun, flesh tender, sweet, melting, juicy, with a pleasant aroma, a good grower and very productive."

Maxatawny, bunches medium, shouldered, compact, berries large, oval white, juicy and delicious; vine hardy, vigorous and productive; a very fine white grape.

Scuppernong, a well known Southern grape; extensively grown.

*Triumph, bunch and berry very large, color white, skin thin, no pulp, delicious flavor; ripens after Concord, vine very healthy, hardy and productive; a very promising new white grape.

SELECT FOREIGN GRAPES.

Foreign Grapes to be grown satisfactorily in this climate, require the protection of glass; with this protection and without fire-heat, they may be grown to perfection, that is in cold vineries.

Price—50 cents each; $5 per dozen, (save new varieties.)

CLASS FIRST—BLACK AND PURPLE GRAPES.

Alicante, Black Prince, Black St. Peter's, Black Damascus, Black Morocco or Kempsey's Alicante, Black Frontignan, Black Hamburg, Black Tripoli, Black Muscat of Alexandria or Muscat Hamburg, Barbarossa, Bidwell's Seedling, Burckhardt's Prince, Cambridge Botanic Garden, Champion Hamburg, Frogmore St. Peter's, Esperione, Early Black Bordeaux, Grizzley Frontignan, Hamburg Richmond Villa, Hamburg Victoria, Hamburg Mill Hill, Hamburg, Wilmot's, Lady Downe's Seedling, Lombardy Black or West St. Peter's, Mrs. Pince's Black Muscat, (new,) Madresfield Court Black Muscat, (new,) Royal Ascot, (new,) Trentham Black, Zinfandel.

CLASS SECOND—WHITE GRAPES.

SMALL FRUITS.

BLACKBERRIES.

15 cts. each, 75 cts. per doz., $3 per 100, (save where priced.)

*Crataegifolius, (new.) This new variety has showy erect stems, six to eight feet high, leaves large dark green, fruit scarlet color, transparent, sugary and agreeable; ripe in July, a great bearer.

Duncan Falls, a vigorous hardy variety, very productive and early.
Kittatinny, fruit nearly or quite as large as Lawton, and of the highest flavor; very hardy and productive. Lawton or New Rochelle, the largest of all, fine flavored. Missouri Mammoth, said to be very large and fine flavored. Wilson’s Early, fruit large and very productive; the earliest of all black-berries. Snyder, very hardy and productive. Wachusett Thornless, very hardy and productive and desirable from being thornless. Warren, very hardy and productive, of medium size, early.

CURRANTS.

The Currant stands pre-eminent among small fruits for its great value. Yet perhaps there is no other fruit which has been treated with as much neglect; the poorest varieties being generally planted to the exclusion of the large finer sorts.

Price 15 cts. each, $1 per doz., (save new varieties.)

Attractor, a fine large red currant.
Belle de St. Giles, (new,) a fine large red fruit.
Black Naples, fruit large and fine; hardy and productive.
Boulogne Red, a fine new large red currant.
Boulogne White, a new white currant.
Caucasus, a very large and fine red currant.
Cherry Red, very large; one of the largest red currants.
Cherry White, similar to the last, but white.
Dana’s White, bunch long; a fine new white currant.
Fertile de Palluau, fruit large and excellent; very productive.
Fertile d’Angers, fruit very large and fine.
Gloire de Sablons, fruit striped, very distinct and novel.
Gondouin White, fruit large, whitish yellow, sweet; good grower.
Imperial White, bunch and berry large, sweet and good.
Knight’s Early Red, the earliest of all reds.
Knight’s Large Red, fruit very large, red, bunches very long and fine; very productive; one of the finest red currants.
Knight’s Sweet Red, fruit of fair size, light red, less acid than other red currants.
La Hative, a very early red currant from France; excellent.
La Versaillaise, berries nearly or quite as large as those of the Cherry Currant, bunches long, the largest red currant, deep red; robust grower and productive.
La Versaillaise, White, (new.) The bunch is as long, finely set, and the berries as big as those of the Red Cherry, are white, transparent, very sugary and very good.
Lee’s New Prolific Black, (new.) Bunches very long, flavor mild and fine. The finest of all Black Currants.
Long Bunched Red Dutch, berries large, bunches very long, deep red; very productive; later than Red Dutch; very good.
Prince Albert, very light, light red, late in ripening; productive, similar to Victoria.
Red Dutch Short Bunched, berries large, deep red; this is a sweet, rich and good currant.
Red Grape, fruit very large, bunches very long, clear red color; very productive.
*Saul’s Long Red, a very vigorous new variety, bunches very long, berries large deep red; a very fine red.
Transparent White, berries large, amber color, bunches long; a fine new French currant.
Victoria, (or Raby Castle,) berries as large as Red Dutch, bright red, bunches very long, hangs longer than any other currant; an excellent late variety.
White Dutch, berries large, yellowish white, bunches long, much less acid than any of the red currants; very popular; the best white currant.
White Grape, berries very large, bunches long, whitish yellow, sweet and good; excellent.

GOOSEBERRIES.

ENGLISH VARIETIES.

We grow the finest varieties of red, yellow, white and green, particularly such as are least disposed to mildew in our climate.

Price—20 cents each, $2 per dozen.

AMERICAN VARIETIES.

Price 15 cents each, $1 per dozen, (save where priced.)

American Seedling, a good grower and great bearer.

Downing's Seedling.

Downing's Seedling, raised from seed by Mr. C. Downing, of Newburg, N. Y. larger than Houghton's; excellent. 20 cts. each, $1.50 per doz.
Houghton’s Seedling, medium size, pale red, flesh tender and good, never mildews; vigorous and prolific.
Mountain Seedling, larger than Houghton’s, good flavor, never mildews; vigorous and productive.
Smith’s Improved, a fine new variety, larger than Houghton.
Utah Seedling. Somewhat like Houghton; productive.

RASPBERRIES.

The cultivation of this useful fruit is carried on very extensively in the vicinity of our large cities; it should not however be overlooked in the smallest garden. A deep rich soil, with liberal manuring, suits it.

Class First—Varieties of the Antwerp Type.

Price 10 cts. each, 75 cts. per doz., $3 per 100, (save new varieties and those priced.)
When sent by mail, 20 cents per dozen, and 70 cents per 100 additional.

Belle de Fontenay, (Autumnal Bearing,) fruit large, round, dark red, sprightly, rich, firm; hardy and productive.
Brandywine, very large, bright scarlet, firm and beautiful; cane very hardy and productive. Sells well in market. One of the best raspberries.
Clark, fruit large, light scarlet; very hardy and productive; a fine new raspberry.
*Cuthbert, (Queen of the Market,) remarkably handsome, the size of Hudson Rivers’ Antwerp, of a deep crimson color.
Delaware, fruit large, bright crimson, luscious flavor, a seedling from Hornet; hardy and productive.
Herstine, berry large, bright crimson color, flavor very good; an excellent grower, an early and abundant bearer. The largest and best hardy raspberry; commands the highest price in market.
Pearl, medium size, bright red, a handsome firm berry.
Philadelphia, berry dark red color, very hardy and productive; grown extensively for market.
*Pride of the Hudson. The finest of red raspberries, very large, very productive and of exquisite flavor.
*Reliance, a seedling of Philadelphia, very hardy and productive, larger and brighter in color.
Turner, fruit medium size, bright scarlet, good quality; a very strong vigorous grower and productive; one of the best.
Thwack, fruit firm, bright red, resembling Brandywine; a very hardy raspberry.
*Winant, fruit very large, bright red and very firm; hardy and productive.

Additional List of Raspberries.

Antwerp Red, (English,) Elm City, Merville des 4 Saisons,
Arnold’s Orange King, Fastolff, Northumberland Fill-bask.
Bristol, Franconia,
Christine, Highland Hardy,

Class Second—American Species and Varieties.

10 cts. each, 50 cts. per doz., $3 per 100, (save new sorts marked ‘*)
American Black Cap or Improved Black Cap, our well-known native Black Cap; hardy and productive.
*Belmont, very large, of excellent quality; hardy and productive, color black—late.
*Caroline, fruit very large, color bright orange, extremely hardy and productive.

Golden Thornless, fruit medium, deep golden color; hardy and productive.

*Gregg, much the largest of this class, very firm, jet black; hardy and productive.

Lum's Everbearing, a variety of Black Cap, which gives fruit in the autumn. $1 per dozen

Mammoth Cluster. The largest Black Cap in cultivation; canes strong and vigorous; very productive, late.

*New Rochelle, fruit large, firm, juicy and high flavored, color red; very hardy and productive.

Ohio Everbearing, an autumnal bearing Black Cap. $1 per dozen.

Additional List of American Raspberries.

Catawissa, Ganargua, Walter's,
Early Cluster, Miller's Daily, Yellow Cap,
Florence,

SELECT STRAWBERRIES.

We grow this valuable quite extensively for market as well as plants, and have tested all the new varieties as they appear, native or foreign. Those we describe will be found most suitable for this latitude and South.

Price—25 cts. per doz., $1 per 100, (save new varieties.)

When plants are ordered by mail add 5 cents per dozen and 25 cents per 100 for postage. Not less than 12 at dozen, nor 50 at hundred rates will be sent by mail.

Class First—Select American Varieties.

Albany, (Wilson's,) fruit large, deep crimson, with a brisk acid flavor, hardy; vigorous and extremely productive.

Belle, large and exceedingly fine; said to be one of the largest.

Boyden's No. 30, fruit very large, bright crimson, flesh firm, juicy and rich; very vigorous and productive.

Champion, globe shape, dark crimson, large size and good quality; a most vigorous grower and very productive.

Cinderella, early, berries large, conical and regular, bright scarlet, firm and excellent flavor.

Col. Cheney, large, bright red, firm, good quality; vigorous, hardy, and very productive.

Cowins Seedling, large, firm, productive; bright red color and good quality.

Charles Downing, fruit large, conical; deep scarlet, flesh light scarlet; moderately firm, juicy, and of excellent flavor; vigorous, productive and hardy; one of the most valuable varieties.

Capt. Jack, fruit very large, beautiful, solid; a vigorous grower and productive; very fine.

Centennial Favorite, fruit large, conical, rich color, very handsome, flavor delicious; continues in bearing a long time; an excellent variety.

Crescent Seedling, medium size, conical, very uniform bright scarlet; beautiful and very firm.
Cumberland Triumph, berries of great size, fine form, beautiful, and of finest flavor; very vigorous and productive, one of the finest.

Duchess, one of the earliest Strawberries, a good grower, fine cropper of fair size and firm.

Duncan, fruit large, rich crimson; a vigorous grower and great bearer.

Essex Beauty, (Durand’s,) berries very large, rich crimson, fine flavor; robust grower and very productive; a magnificent large fruit.

Forest Rose, a magnificent large berry, rich crimson color, very fine flavor and firm; very vigorous and productive.

Fillmore, fruit large, globular, dark red, flesh firm, juicy, sweet and rich; plant very vigorous and productive; one of our standard varieties.

Glendale, very large, very firm and late; a strong grower and productive.

Great American, magnificent, berries have measured nine inches in circumference; a robust grower and heavy cropper. Said to be the finest of all Strawberries.

Kentucky, fruit large, bright scarlet, flesh firm, juicy, rich and sweet; said to be a week later than other varieties; plant vigorous and productive.

Miners’ Great Prolific, berries very large, deep crimson, fine flavor, late and wonderfully productive.

Monarch of the West. One of the largest and best market strawberries in cultivation, a strong vigorous grower, giving its magnificent fruit in great abundance.

President Lincoln. An immense berry. It is stated by the raiser that “10 berries weighed 17 oz. and were between 10 and 11 inches in circumference.” A vigorous grower and great bearer.

Prouty’s Seedling, berry medium, conical, bright red, very firm; a very vigorous free grower and great cropper—early.

Red Jacket, early, very large, dark crimson, exceedingly sprightly and productive.

Russell’s Advance, four to five inches in circumference, bright crimson, fine flavor, firm: a vigorous grower and very productive.

Sharpless Seedling. Large to very large, one and a half inches in diameter, oblong, clear bright red, firm, sweet with a delicate aroma, first quality. Plant vigorous and luxuriant, hardy and productive.” Said to be one of the finest of strawberries.

Springdale, (p) very large, beautiful and productive.

Sterling, (p) berry large, rich crimson, fine flavor and an excellent cropper; a very good variety.

GENUINE GARDEN SEEDS.

At my Seed Warehouse, No. 621 Seventh Street, opposite U. S. Patent Office, will be found, an extensive as well as one of the best selected assortments of Garden, Flower and Agricultural Seeds in the United States. It includes all the valuable sorts of home-growth, as well as the standard varieties and novelties from England, France and Germany. Being a practical seed-grower I can confidently warrant all as to purity and accuracy. Prices as low as any house in the trade.

Green House and Bedding Plants, Dutch Flowering Bulbs, with every article pertaining to the Nursery and Seed Trade, can be supplied of best quality and cheap.

PREMIUMS.

FOR PEARS.

I have taken Premiums as follows for collections of Pears, which will give our patrons some idea of the varieties and quality of fruit we grow:

American Pomological Society, Richmond, Va., September, 1871; Boston, Mass., 1873; Chicago, Ill., 1875; Baltimore, Md., 1877; Rochester, N. Y., 1879, Bronze Medals for a large and superior collection of Pears.

DWARF PEAR.

Maryland Horticultural Society, Baltimore, September, 1875, First Premium for the largest and finest collection of Pears—also in 1876, ’77, ’78 & ’80.

Pennsylvania Horticultural Society, Philadelphia, September, 1876, First Premium for a large and superior collection of Pears.

FOR PLANTS.

I was Awarded the following Premiums at the Cincinnati Industrial Exposition, September, 1879.

First Premium—"Best Group of Crotons."
First Premium—"Best Single Specimen of Croton."
First Premium—"Best Group of Dracaenas."
First Premium—"Best Group of Marantas."
First Premium—"Best Single Specimen of Maranta."
First Premium—"Best Single Specimen of Dieffenbachia."
First Premium—"Best Single Specimen of Variegated Foliage Plant."
Second Premium—"Second Best Group of Variegated Foliage Plants."
Special Premium—"For Davallia Mooreana.

I have also been awarded for several years, leading Premiums by the Maryland Horticultural Society for Dracaenas, Crotons, Foliage Plants, Stove and Green House Plants, Ferns, &c. In Cut Flowers, for Dahlias, Roses, Phloxes, Herbaceous Plants, &c.
